

I sedimenti della storia millenaria della terra formano una roccia che porta con sé, e con i suoi colori, i racconti affascinanti delle sue origini. L'abile uso della spatola riesce a creare una superficie irregolare che aggiunge un tocco di matericità e naturalezza alla forza di Pietra Continua.

Sediments from the millennial history of the earth form a rock that brings with it, and with its colours, the fascinating tales of its origins. Skillful use of a trowel/spatula can create an irregular surface that adds a touch of materiality and naturalness to the strength of Pietra Continua.

PIETRA CONTINUA

CALCARE

La nuova cartella MAGMA presenta 22 colori dedicati ai nostri effetti PIETRA più richiesti: Basalto e Calcare. I colori WARM, COLD e DARK sono realizzabili aggiungendo il Toner ErreLAB del colore scelto alla BASE PIETRA NEUTRA. I colori LIGHT si ottengono invece dalla nuova BASE PIETRA LIGHT. Tutti i colori sono realizzabili anche con il sistema tintometrico COVEMAGROUP. Basalto e Calcare sono effetti realizzabili a pavimento e a parete seguendo le indicazioni riportate sul nostro manuale SISTEMI APPLICATIVI e i video tutorial disponibili sul canale YouTube ERRELAB.

This new MAGMA Color Collection features 22 colors dedicated to our most popular PIETRA CONTINUA effects: Basalto and Calcare. The WARM, COLD, and DARK colors are created by adding the selected ErreLAB Toner to the BASE PIETRA NEUTRA. The LIGHT colors are obtained using the new BASE PIETRA LIGHT. All colors can also be produced using the COVEMAGROUP tinting system. Both Basalto and Calcare effects can be applied to floors and walls, following the instructions in our APPLICATION SYSTEMS manual and the video tutorials available on the ERRELAB YouTube channel.

MAGMA

PIETRA CONTINUA

I COLORI DI BASALTO E CALCARE

BASALTO

PIETRA CONTINUA

Dal cuore della terra, magma incandescente che diventa roccia. Pietra liquida che si solidifica e che ispira la maestria artigiana a stratificare la resina con mano forte per creare un materiale compatto e resistente, dalla matericità sobria e austera. Lava dal vulcano che porta alla luce, con i suoi colori, le storie più immaginifiche di viaggi al centro della terra. Pietra Continua BASALTO è l'esclusiva resina dura ErreLAB che definisce nuovi parametri nella realizzazione di pavimenti e superfici continue.

From the heart of the earth, incandescent magma that becomes rock. Liquid stone that solidifies and that inspires craftsmen to stratify the resin with a strong hand to create a compact and resistant material, with a sober and austere materiality. Lava from a volcano that, with its colours, brings to light the most imaginative stories of travel to the centre of the earth. Pietra Continua BASALTO is the exclusive ErreLAB hard resin that defines new parameters in the laying of floors and continuous surfaces.
